Dear Students,

We are pleased to invite you to participate in the Blended Intensive Programme (BIP) **"International Perspectives in Health Sciences: Global Challenges, Innovation and Collaboration"**, organised by Powiślańska Academy of Applied Sciences in Gdańsk, Poland.

This international programme offers a valuable opportunity to broaden your understanding of contemporary challenges in health sciences, healthcare systems, patient care, innovation, and international cooperation in the medical and health-related fields. You will gain practical knowledge and intercultural experience while working with students, lecturers, and experts from different countries.

Key Information:

- **Deadline for application:** 13th of April, 2027 🗓️
- **Online component:** May 2027
- **On-site component:** 18-22 of May, 2027
- **3 ECTS** points
- **Location:** Gdańsk, Poland 📍

The BIP combines an online introduction with an intensive in-person experience. During the programme, you will:

• attend lectures delivered by international experts,

• participate in interactive workshops and group activities,

• explore current global challenges in health sciences and healthcare,

• discuss innovation, collaboration, and good practices in medical and health-related education,

• develop intercultural, communication, and professional skills,

• connect with students from different countries and academic backgrounds

As part of the programme, you will also take part in selected cultural and study visits, including exploring the city of Gdańsk and its surroundings.

Please contact your International Office in order to see the availability of places and if agreed with the Office, they will send us the nomination.

This programme is designed especially for students in the fields of health sciences and related disciplines, including nursing, midwifery, emergency medicine, public health, medical sciences, dietetics, cosmetology, and other healthcare-related areas. It is addressed to students who are interested in gaining international experience and expanding their academic and professional perspectives in the health sector.
